OFFICIAL STANDARD OPERATING PROCEDURE & USER MANUAL

SRI KATHIRAVAN & CO.

Portal Operations Manual

Complete enterprise guide to roles, security permissions, client onboarding, protected document storage, billing, and automated invoice delivery.

Multi-Tier Access Control

Comprehensive role governance separating Super Admin, Staff, and Client portals with dedicated privileges and two-factor safety.

Protected Document Vault

Zero-leakage HTML5 Canvas document rendering that completely eliminates native browser save and download buttons for staff.

Instant Billing & Invoicing

Vector-sharp GST invoices, receipts, automated HSN/SAC lookups, 1-click WhatsApp and email attachments, and outstanding tracker.

High-Speed Delivery Engine

Dual-channel communications powered by Brevo HTTPS REST API (Port 443) for OTP authorizations and automated PDF alerts.

Sri Kathiravan & Co.

Tax, Audit & Financial Advisory Consultants

Salem, Tamil Nadu, India • contact@srikathiravan.com

VERSION 2.0 • 2026 EDITION

System Classification: Confidential Internal SOP

01 System Overview & Architecture

The **Sri Kathiravan & Co. Cloud Office Management Platform** is a unified tax, audit, and financial compliance portal. Designed specifically to modernize Chartered Accountancy, GST filing, Income Tax compliance, and corporate client relationship workflows, it establishes an airtight boundary between internal office operations and external client communications.

> 💡 **Primary Mission & Security Mandate**
> To deliver seamless financial document filing, instant invoice generation, and one-click WhatsApp/Email sharing, while strictly enforcing client data protection and eliminating unauthorized document downloads by unauthorized staff.

📑 Table of Contents

Section	Module & Topic Covered	Key Functional Capabilities
Section 02	Roles, Permissions & Access Hierarchy	Admin vs. Staff vs. Client capabilities, 2FA authorization, permission matrix.
Section 03	Client Onboarding & Profile Management	Dynamic registration, mandatory fields, membership tiers, lifetime storage.
Section 04	Documents & File Management Hub	10 filing categories, 3 storage scopes, Canvas protected viewer, deletion approvals.
Section 05	Invoicing, Receipts & Billing Engine	Tax invoices, HSN & GST breakup, payment receipts, vector PDFs, 1-click WhatsApp.
Section 06	Security, OTP & Communications	Brevo HTTPS REST API, 2FA staff login authorization, tamper-resistant audits.
Section 07	Troubleshooting & Frequently Asked Questions	Resolution for common operational questions, OTP checks, and invoice revisions.

🏛️ Three-Tier Cloud Architecture

👑 1. Administration Core

Global oversight of accounts, staff, fee collection, client records, custom registration schemas, and final deletion approvals.

👔 2. Staff Operations Hub

Client document handling, folder structuring, compliance filing uploads, and secure previewing with zero-download enforcement.

👤 3. Client Self-Service

Personalized portal for viewing filings, invoices, receipts, membership privileges, and booking appointments.

02 Roles, Access Levels & Permissions

The system enforces Role-Based Access Control (RBAC) to ensure that sensitive financial data, tax records, and client files are strictly compartmentalized.

📊 Enterprise Permission Matrix

System Feature / Operation	👑 Super Admin	👔 Staff Member	👤 Client
Client Registration & Onboarding	Full Access	Restricted	Self Only
Dynamic Field Configuration	Full Access	No Access	No Access
Upload Client Documents	Full Access	Allowed	Allowed
View Documents in Browser	Full Preview	Protected Canvas	Full Preview
Download Document to Local Disk	Allowed	STRICTLY BLOCKED	Own Files Only
Direct File Deletion from AWS S3	Direct Delete	Request + Reason	No Access
Create Invoices & Billing Bills	Full Control	Restricted	View / Pay Only
Issue Payment Receipts	Full Control	Restricted	Download Only
WhatsApp / Email Document Share	1-Click Dispatch	No Access	No Access
Login 2FA OTP Requirement	Master Approver	Requires Admin OTP	Direct Password

🔒 **The Staff Security Boundary (Zero-Download Guarantee)**

Under office governance rules, staff members are never permitted to download or save confidential client tax documents onto personal devices. The protected viewer renders files onto a sandboxed HTML5 Canvas, completely disabling the browser's download toolbar, right-click, and print shortcuts.

03 How to Onboard & Manage Clients

Onboarding a client correctly is fundamental to ensuring accurate tax invoicing, GST auto-calculation, and document routing. The portal supports both standardized entity fields and custom dynamic schemas.

📋 Step-by-Step: Registering a New Client

1 Navigate to Client Directory

From the Administrator sidebar, select **Clients**. Click the **Register New Client** tab on the top action bar.

2 Enter Primary Contact & Entity Particulars

- **Full Name / Trade Name:** e.g., *Sri Balaji Traders*
- **Legal Contact Person:** e.g., *K. Ramanathan*
- **Primary Mobile Number:** Exact 10-digit number (used for WhatsApp dispatch & portal alerts)
- **Email Address:** Official business email for PDF dispatch

3 Tax Registration Numbers (GSTIN & PAN)

- **GSTIN (15 Digits):** Automatically validated for state code prefix (e.g., `33AAAAA0000A1Z5` for Tamil Nadu).
- **PAN (10 Digits):** Automatically converted to uppercase.

4 Complete Dynamic Form Custom Fields & Save

If custom fields have been enabled in *Settings > Customizable Client Form* (such as MSME Udyam No, Turnover Category, or Auditor Name), fill in those values. Assign a secure initial password and click **Submit Registration**.

🏆 Membership Tiers & Privileges

🥈 Silver Member	🥇 Gold Member	🏆 Platinum Member
Standard compliance filing, document notifications, standard 1-year file retention on portal.	Priority filing support, multi-device access, 3-year extended document archive.	**Permanent Lifetime File Storage** with zero expiration limits. All uploads automatically preserve expiration-free status.

✨ **Pro-Tip: Instant Client Search in Billing**

Once registered, typing even 2 characters of the client's name, mobile number, or GSTIN in the Invoicing screen instantly auto-fills their address, state code, PAN, and outstanding dues!

04 Document & File Management Hub

All client submissions, compliance forms, and office filings are persisted in a high-security AWS S3 repository with metadata indexing.

🗂️ 10 Compliance Document Categories

Category Key	Category Purpose	Typical Files Included
GST Documents	GST Returns & Challans	GSTR-1, GSTR-3B, GSTR-9 Annual, ITC-04, Payment Challans
ROC Documents	Registrar of Companies filings	Annual Returns (MGT-7), Financials (AOC-4), Board Resolutions
Tax Documents	Direct Tax & Income Tax	ITR-V Acknowledgments, Computation sheets, Form 16, Form 26AS
Financial Statements	Audited Accounts & Ledgers	Balance Sheets, Profit & Loss, Trial Balances, Fixed Asset Registers
Pay Rolls	Salary & Employee Benefits	Monthly Wages, EPF ECR Challans, ESIC receipts, Professional Tax
Certificates	Statutory Attestations	Turnover Certificates, Net Worth Certificates, 15CA/15CB
Compliance Notice	Departmental Notices & Replies	GST ASMT-10, Income Tax 143(1), Show Cause Notices, Written Submissions
Important File	Foundational Entity Records	Partnership Deed, MOA/AOA, Pan Cards, Lease Agreements
Other Documents	General Business Records	Bank Confirmations, Vendor agreements, Miscellaneous correspondence

🛡️ The Protected Document Viewer (Staff Safeguard)

When a staff member clicks **View Document**, the system activates the proprietary `ProtectedDocumentViewer` component:

🚫 Zero Download Toolbars

Because the PDF is drawn directly onto an HTML5 canvas, the native browser PDF menu (with the Floppy Disk Save icon and Print icon) is completely eradicated.

⛔ Blocked Shortcuts & Right-Click

Pressing `Ctrl+S`, `Ctrl+P`, `Meta+S`, or right-clicking triggers immediate suppression. Text highlighting and drag-to-desktop are blocked.

🗑️ Two-Man Rule: Staff Deletion Requests

To prevent accidental data loss or intentional tampering, staff cannot directly delete documents. They must click **Request Deletion** and submit a mandatory business justification. The Super Admin reviews the request in the Notifications & Authorization center before any file is removed from AWS S3.

05 Invoicing, Receipts & Billing Engine

The Billing Hub provides 100% vector-sharp, GST-compliant invoicing with automated calculation of CGST, SGST, IGST, discounts, and outstanding balances.

📄 Step-by-Step: Creating a Professional Tax Invoice

1 Open Creator Mode

Under **Invoices & Receipts**, click **Create New Document**. Ensure the mode toggle is set to **INVOICE**.

2 Select or Search Client

Type in the *Client Search* bar. Select the client. The system automatically loads their GSTIN, PAN, Address, and checks if they have previous unpaid balances.

3 Add Service Line Items

- **Description:** e.g., *GST Annual Return Filing & Audit Reconciliation (FY 2025-26)*
- **HSN/SAC Code:** Auto-populated (e.g., `998231` for Tax Services)
- **Rate & Quantity:** Enter consulting fees. The system dynamically computes Base Value, Discount %, and GST (18%).

4 Review Tax Breakup & Outstanding Balance

Intra-state sales automatically split into **CGST (9%) + SGST (9%)**. Inter-state sales compute **IGST (18%)**. If previous dues exist, they are summarized cleanly in the bottom breakdown.

5 Save & Generate Document

Click **Save & File Document**. The document is archived with a unique sequential serial number.

🔘 Action Buttons Guide (What Each Button Does)

In the Invoices & Receipts table, each button is explicitly labeled for crystal-clear operation:

- **View** — Opens instantaneous vector preview modal with live print rendering.
- **PDF** — Downloads razor-sharp high-DPI vector PDF directly to your PC.
- **Print** — Dispatches document directly to system printer without browser margins.
- **Edit** — Loads invoice details back into Creator mode for immediate revision.
- **WhatsApp** — **1-Click WhatsApp:** Opens chat with pre-filled message and attached PDF.
- **Email** — **1-Click Email:** Dispatches professional invoice email with PDF attachment.

Archive Toggles document between active view and historical archive.

Delete Permanently removes document record (Super Admin only).

06 Receivables Tracking & Security Engine

💰 Outstanding Receivables: "Who Needs to Pay & How"

Managing client cash flow is effortless with the built-in Outstanding Tracker. Clicking the **"Who Needs to Pay & How"** header button opens the instant receivables drawer:

⚡ 1-Click WhatsApp Payment Reminder

Generates an instant personalized reminder to the client's mobile containing their exact outstanding balance, pending invoice number, and official firm bank accounts (UPI & NEFT).

🧾 Quick Payment Receipt Generator

Clicking *Issue Receipt* automatically pre-fills the client's details, links to their pending invoice, and allocates payment across Cash, Cheque, UPI, or Bank Transfer.

🔐 Brevo REST API Dual-Channel Communications

Traditional SMTP connections (ports 25, 465, 587) are frequently throttled or blocked by cloud hosting firewalls. Sri Kathiravan & Co utilizes a resilient **HTTPS REST API v3** architecture:

Delivery Channel	Protocol & Port	Reliability Safeguard
Brevo HTTPS REST API	HTTPS / Port 443 (Outbound)	Primary channel. Bypasses SMTP port blocking. Instant 201 delivery.
JavaMail SMTP Fallback	STARTTLS / Port 587	Automatic secondary failover with 5000ms socket timeout guard.
In-App Notification	WebSocket & REST DB Sync	Instant real-time notification bell update in portal header.

🚨 **Important: API Key vs. SMTP Password**

When configuring the Brevo integration, ensure you copy the **API Key (v3)** starting with `xkeysib-...` from the *API Keys* tab in your Brevo dashboard. Do not paste an SMTP password (`xsmtpsib-...`), as the REST API strictly requires an authorized v3 API key.

🛡️ Administrative Action Safeguards

Sensitive actions—such as deactivating an administrator account or authorizing staff login from an unrecognized device—require a 6-digit Time-based Security Code dispatched via email to the firm's verified managing partners.

07 FAQs & Troubleshooting Guide

Q1 **Why does a staff member not see a "Download" button for client files?**

Answer: By design, staff are restricted to secure online viewing only. This prevents confidential client tax documents and balance sheets from leaking onto unauthorized devices.

Q2 **How do I send an invoice PDF to a client who does not check email?**

Answer: Open the Invoices table and click the green **WhatsApp** button. The portal opens WhatsApp Web/Mobile with the client's phone pre-filled, an executive message, and download link.

Q3 **What should I do if a staff member forgot their password or cannot log in?**

Answer: The administrator can reset the staff password in *Staff Management*. When the staff logs in, an authorization OTP is dispatched to the admin's email to verify the session.

Q4 **Why are files for Platinum members never archived or deleted automatically?**

Answer: Platinum Membership entitles clients to lifetime expiration-free file storage on AWS S3 with permanent access guarantee.
